TO: Arc-Tronics Inc. Printed Circuit Assembly Customers

RE: Statement on California Proposition 65 Substances in Customer Products Assembled by Arc-Tronics, Inc.

Dear Valued Customer:

California's Proposition 65, officially known as the Safe Drinking Water & Toxic Enforcement Act of 1986 (<https://oehha.ca.gov/proposition-65>) contains a list of chemicals and exposure thresholds which the State of California has determined present a risk of cancer, birth defects or other reproductive harm. The entire list of chemical substances can be found on the State of California website at <https://oehha.ca.gov/proposition-65/proposition-65-list>.

Arc-Tronics Inc. is a "build to print" assembler, an electronics contract manufacturing service provider, primarily of custom populated printed circuit boards (PCBA), wire harnesses and box build assemblies. Each part is manufactured to order and in accordance with the design and material specifications provided by you, the customer, when each order is placed. AS such, potentially required WARNING labels must be of Customer design, included in their specifications as Arc-Tronics is NOT allowed per contract to add labels at our discretion.

Arc-Tronics, Inc. has asked our Suppliers to compare the products we procure to the MAY 2018 updated PROP 65 list and which we might add to the Customer's assembly through the Customer design specification or by way of a production supply. To date, all listed substances known to be contained in the base circuit boards we may suggest the use of and/or in the production supplies we do use do NOT CONTAIN any of the chemicals listed in the MAY 2018 PROP 65, except for the following:

Customers design specifications requiring GOLD on their PCB assembly, edge connectors or other area of the PCB. OFTEN Nickel will be plated UNDER the GOLD. All NON-RoHS assemblies will have LEAD in the solder used during the assembly process. Wire Harness, cables and Box build assemblies MAY have areas that Users may come into contact with. Again, use of specified warning labels is per Customer design only. Electronics, PCBA when discarded User must follow Legal requirements when taking such an action that safeguards the environment.

Sincerely,

A handwritten signature in black ink that reads "Michael Goeringer".
